

AI Engineer – Senior

Experience: 5+ years

Key Responsibilities:

- **Lead the design, development, and deployment of AI/ML models and pipelines.**
- **Optimize models for scalability, accuracy, and efficiency.**
- **Mentor junior engineers and define best practices in AI/ML development.**
- **Collaborate with cross-functional teams to integrate AI solutions into products.**
- **Evaluate new AI/ML tools, frameworks, and research to enhance capabilities.**

Detailed Requirements:

- **Bachelor's or Master's degree in AI, Computer Science, Data Science, or related fields.**
- **5+ years of professional experience in AI/ML engineering.**
- **Strong programming expertise in Python or Java; familiarity with R is a plus.**
- **Hands-on experience with TensorFlow, PyTorch, Keras, or similar deep learning frameworks.**
- **Proficiency in ML algorithms: classification, regression, clustering, recommendation, NLP.**
- **Solid understanding of model deployment and cloud services (AWS SageMaker, GCP AI, Azure ML).**
- **Experience with data pipelines, preprocessing, feature engineering, and model evaluation.**
- **Strong problem-solving, leadership, and project management skills.**
- **Ability to communicate technical concepts clearly to stakeholders.**
